

## Sphag Sorb<sup>®</sup> is Versatile

This list includes some of the common hydrocarbons and industrial chemicals that can be effectively absorbed by Sphag Sorb<sup>®</sup>.

Acetone	Ethanol	Paraffin Oil
Acetone Cyanohydrin	<b>Ethyl Benzene</b> *	Pentane
Acetonitrile	Ethyl Ether	Pentachlorophenol
Acrolein	Ethylene Glycol	Petroleum Ether
Allyl Chloride		Phenol
Amyl Acetate	Gasoline	Propanol (48% in Acetone)
Acetonitrile		Pyridine
	Heptane	Silicone Oil (100cs)
<b>Benzene</b> *	Hexane	Styrene
Bromodichloromethane	Hexachlorobenzene	
Bromoform	Hexachlorobutadiene	Tetrachloroethane
Bunker C Fuel Oil	Hexachloroethane	Tetrachloroethylene
Butanol	Hexene (97%)	Tetrahydrofuran
Butanone		<b>Toluene</b> *
Butyl Acetate	Isobutanol	Trichloroethylene
Butyric Acid	Isoprene	Trichlorophenol
	Isopropanol	Triethylamine
Canola Oil	Jet Fuels	Varsol
Carbon Disulfide		Vinyl Acetate
Carbon Tetrachloride	Kerosene	Vinyl Chloride
Chloroform		
Chloromethane	Methano	<b>Xylenes</b> *
Chlorobenzene	Methylene Chloride	
Corn Oil	Methyl Ethyl Ketone	
Cresol	Methyl Methacrylate	
Cutting Oils	Methyl Phenol	
Cyclohexane	Motor Oils	
	Most organic solvents	
	Most acids and bases	
Dichlorobenzene	Naphthalene	
Dichloroethene	Nitrobenzene	* - <b>BTEX</b>
Dichloroethylene	Nitroaniline	
Dichloromethane		
Diesel Fuels		
Dinitrotoluene	Oil Base Paint & Ink
