

Comparison of Sphag Sorb vs Polypropylene

These calculations are based on 30 gallons of oil absorbed for disposal.

Polypropylene

30 Gallons would require 350 pads @
\$0.75 = \$262.50

SPHAG SORB

30 Gallons would require 2.5 bags of *SPHAG SORB* @
\$34.50 = \$ 86.25

(Polypropylene brochure information with regards to absorption capacities is rated at 2.5 times usage of each pad. The comparison shown above is for one time usage, which is what happens in the majority of actual application.)
