ATTN: Management

Re: RED ABALONE - SHORT - TERM - TOXICITY - TEST

Dear Management

The above referenced analysis was performed on your product, SPHAG SORB.  
All indicators show that SPHAG SORB in its raw form is within the percentile accepted as non-toxic to the environment.  
The results of the analysis are listed below.

### **RESULT SUMMARY**

The Sample was found to have 98.4% of larvae with normal development. The Control Sample was found to have 95.7% normal development and the blank had 98.9% normal development.

Again, indicators show that raw SPHAG SORB is within the acceptable percentile of being non-toxic to the environment.

Should you have any further questions, please contact our office.

Sincerely

Tina Sagona  
Customer Service Manager
